

Waygr — Brand brief

Positioning and voice

Waygr is the group chat's scoreboard. It should look like a premium sports broadcast and sound like your funniest friend: confident, quick, a little cocky, never mean.

Voice rules:

- **Short.** Headlines run five words or fewer. No sentence in the app runs past 15.
- **Talk trash, not trash about people.** Jokes land on the call, never on someone's looks, money or intelligence.
- **Say "call" and "challenge," never "bet," "wager," "odds" or "payout" in the UI.** The name is the only wink. Sportsbook words make it read as gambling and pull it away from friends having fun.
- **Losing is never red and never shamed.** A loss gets a shrug and a rematch button.
- **Numbers are exact.** "KC covered by 3.5," never "KC covered easily."

Moment	Copy
Challenge preview	Sam says Chiefs –3.5. Loser wears the other team's colors for a week. You in?
Accept button / decline	I'm in / Not this one
Accepted	You're on.
Live, your side ahead / behind	You're up. / Jordan's up.
Win	Called it.
Loss	Not your night. Rematch?
Push	Push. Nobody owes.
Game postponed or canceled	Game's off. Challenge voided.

Forfeit owed	You owe Sam one.
Forfeit paid	Paid in full.
Rivalry nudge	Sam leads you 4–3. Chiefs play Sunday.
Empty home	No calls yet. Cowboys at Eagles, 7:20. Make one.
Score feed down	Score's lagging. Retrying.

Color

Dark-first, because people use Waygr at night, next to a TV. Light mode is a full twin that follows the system setting. Waygr Orange is you; Rival Blue is them. Orange and blue stay easy to tell apart for the most common kinds of color blindness, and every side also carries a name, so color is never the only signal.

Token	Dark	Light	Use it for	Contrast (checked)
bg	#0B0B0D	#FAFAF7	App background	—
surface	#16161A	#FFFFFF	Cards, sheets	—
raised	#202026	#F1F0EC	Pressed states, inputs, meter track	—
border	#2E2E36	#E2E0DA	Card edges, dividers	—
text	#F5F3EF	#121214	Body and headlines	14.6:1 or better
muted	#A1A1AA	#5E5E66	Labels, timestamps, secondary copy	5.6:1 or better
orange	#FF5F1F	#FF5F1F	Your side, primary buttons, the wordmark, LIVE	Dark 5.3:1 or better as text; ink on orange 6.5:1
orange-strong	#FF5F1F (same as orange)	#C2410C	Orange text, icons and thin marks in light mode	4.5:1 or better
blue	#4D8DFF	#2563EB	Their side	4.5:1 or better
green	#34D17D	#166534	Paid, accepted, confirmed	6.2:1 or better

rose	#FF4D6D	#BE123C	Form errors and failures only	5.0:1 or better
on-accent	#0B0B0D	#0B0B0D	Text on orange, blue (dark) and green (dark) fills	6.1:1 or better

Every text pair was checked against WCAG 2.1 AA (4.5:1) on `bg`, `surface` and `raised` in both modes, and all pass.

Rules the coding agents follow:

1. **Text on orange is always ink (#0B0B0D), never white.** White on this orange is 3.0:1 and fails.
2. **Orange means you and "do this."** One orange button per screen.
3. **Blue only ever means the other side.** No blue links or blue buttons.
4. **No red for losing.** A loss is `muted` plus an orange Rematch button. Rose is for errors only.
5. **Green only for done states:** paid, accepted, settled in your favor.
6. **The leader gets size and weight, not a new color.** Sides keep their color the whole game.
7. **The one gradient** is an orange glow in the corner of share cards. Nowhere else.

```
:root {
  --bg:#0B0B0D; --surface:#16161A; --raised:#202026; --border:#2E2E36;
  --text:#F5F3EF; --muted:#A1A1AA;
  --orange:#FF5F1F; --orange-strong:#FF5F1F; --blue:#4D8DFF;
  --green:#34D17D; --rose:#FF4D6D; --on-accent:#0B0B0D;
}
@media (prefers-color-scheme: light) {
  :root {
    --bg:#FAFAF7; --surface:#FFFFFF; --raised:#F1F0EC; --border:#E2E0DA;
    --text:#121214; --muted:#5E5E66;
    --orange:#FF5F1F; --orange-strong:#C2410C; --blue:#2563EB;
    --green:#166534; --rose:#BE123C; --on-accent:#0B0B0D;
  }
}
```

In light mode, text on `blue`, `green` and `rose` fills is white (5.1:1 or better). Use `--orange-`

strong for any orange text or icon so one class works in both modes.

Type

Two free Google Fonts. Both have tabular figures (checked in the font files), so scores and clocks never jitter as digits change.

Role	Font	Size / line height	Notes
Wordmark, "Called it."	Barlow Condensed ExtraBold Italic	Wordmark 22–28 px; about 260 px on 1080-wide share cards	The italic leans forward. Big moments only
Scores	Barlow Condensed ExtraBold	64 / 64 on live, 40 / 40 in lists	<code>tabular-nums</code> always
Headline (the call)	Barlow Condensed ExtraBold, uppercase	40 / 40	Two lines max
Title	Inter SemiBold	20 / 26	Screen and sheet titles
Body	Inter Regular	16 / 24	16 px minimum so iOS never zooms on input focus
Label	Inter SemiBold, uppercase, +6% tracking	13 / 16	Eyebrows: "SAM CHALLENGED YOU," "LOSER"
Caption	Inter Medium	13 / 18	Timestamps, fine print

Text respects the phone's text-size setting up to 200% without breaking layouts.

Layout, components and motion

- **Spacing:** 4 px base. Use 4, 8, 12, 16, 24, 32, 48. Screen side padding is 20 px.
- **Radius:** cards 16, buttons 14, sheets 24 on top corners, pills and avatars fully round.
- **Touch targets:** 44 × 44 px minimum; primary buttons are 56 px tall, full width, pinned to the bottom within thumb reach.

- **One primary action per screen**, in orange. Secondary is text only in `muted`.
- **Depth comes from surfaces and borders, not shadows.** No drop shadows in dark mode.

Component	Spec
Primary button	<code>orange</code> fill, <code>on-accent</code> text, Inter Bold 17; pressed state scales to 0.98
Side chip	Avatar (orange or blue ring) + name + the call ("KC -3.5"), in that side's color
Live pill	"● LIVE · Q3 4:12," orange text on 14% orange; the dot pulses every 2 s
Challenge meter	8 px bar, your share in orange, theirs in blue, animates on each score update
Score strip	Team abbreviation label over a Barlow score, clock in the middle
Rivalry line	"You lead Jordan 4-3" in <code>muted</code> , tappable to the head-to-head history
Bottom sheet	Create-challenge flow; <code>surface</code> , 24 px top radius, drag handle
Toast	Bottom, 4 s, one action max ("Undo")

Motion: 150 ms for taps, 250 ms for sheets and screen changes, ease-out. Settle gets one moment: "Called it." scales in with a short orange burst. Nothing loops except the live dot. With the system's reduced-motion setting on, every animation becomes a plain fade.

Wordmark, icon and share cards

Wordmark direction: "Waygr" in Barlow Condensed ExtraBold Italic, tracking -1%, Waygr Orange on ink, ink on orange. The Designer bot should draw a custom version: tighten the "yg" pair and cut the descenders so they sit cleanly on one baseline.

App icon direction: an orange square with a heavy italic ink "W," nothing else. It has to read at 29 px on a home screen. No gradients, no ball, no dice.

Share card (1080 × 1350):

- Ink background with the orange corner glow, top right.
- Top: final score as a label ("CHIEFS 27 · BILLS 20 · FINAL").
- Center: "CALLED IT." at about 260 px in orange, Barlow ExtraBold Italic.

- Winner avatar, name, and the call with its margin ("KC -3.5 · covered by 3.5").
- Divider, then the forfeit in the loser's name and the rivalry record in muted .
- Bottom: wordmark left, "Tap to rematch" right. 64 px safe margin all around.

The story version (1080 × 1920) stacks the same parts with more air. The link preview (1200 × 630) puts the call on the left and both avatars on the right.

The preview below ([waygr-brand-preview.png](#) , attached) shows the palette, the accept screen in both modes, the live screen and the result card. Treat it as direction, not a pixel spec.
